Netflix of Data Pioneer | Designing intuitive, metadata-driven
platform to democratize data access and governance

France

Résumé

Metadata structures data to make it understandable, traceable, and
actionable.

Expérience

Kering

Head of Metadata & Data Catalog

juillet 2021 - Present (5 ans)

Ville de Paris

Building a unified solution to publish data products cross domains

(Supplychain, Sales, Customer, Tech, Finance, Omnichannel...), data assets,
KPIs and definition through metadata-driven governance

- Designed and led the implementation of a collaborative data governance platform, providing off-the-shelf visibility of data assets for both business and tech teams : promoting compliance, transparency, and innovation.
- Developed a data marketplace to support Kering's data mesh strategy, promoting data literacy and enabling domain-driven ownership through a self-service model:
 - Embedded generative AI capabilities to capture functional knowledge and contextual explanations, helping users better understand, consume, and design more relevant data products.
- Integrated with the Kering Data Platform (GCP) to ensure end-to-end consistency and traceability, automating data lineage from source-aligned products to business dashboards.
- Created an engaging and intuitive user experience to drive data literacy and ownership across the group's brands and functions.
- Launched and scaled a data adoption and literacy program to democratize data within the business:
 - Published educational content (articles, videos, internal newsletters, and posts on Viva Engage) to demystify data concepts and showcase real-life use cases.
 - Led change management initiatives to support teams throughout their data transformation journey.

- Organized regular sessions to upskill business and domain teams on key data governance principles and catalog usage.
- Oversaw Build & Run operations, driving successful deployments with Kering's domain teams and maisons, including Boucheron, Saint Laurent, and Balenciaga.
- Led a multidisciplinary technical team (Tech Lead, Data Engineers, Lead Designer, and Data Architects), ensuring both innovation and operational excellence.

SEPHORA

Data Architect & Data Literacy Lead

mars 2020 - juillet 2021 (1 an 5 mois)

Ville de Paris, Île-de-France, France

Responsible for knowledge management related to data models, MDM design, and core modeling

- Defined the Business Glossary and legacy reference data adapted to multiple business cases.
- Developed a pivot-style technical model document derived from the Business Glossary.
- Created relational and class diagrams to illustrate core data object models.
- Implemented a data catalog to support data lineage using DataGalaxy.
- Extracted metadata to specify and build data workflows.
- Designed functional and technical mappings representing core data models and MDM structures.
- Provided continuous support to Data Engineering teams.
- Assisted Project teams and cross-functional technical departments.

Danone

Business Application Platform Lead

mars 2020 - mars 2021 (1 an 1 mois)

Ville de Paris, Île-de-France, France

Building a self-service digital platform for tech teams

- Established a preconfigured common foundation of tools enabling IT and Business Development teams to efficiently create digital applications.
- Led the global citizen developer platform initiative by implementing design tooling, low-code/no-code frameworks, BPM, RPA, and self-service BI & dashboarding solutions.
- Acted as Solutions Architect, performing technical assessments for the Cloud Committee within Danone's organizational structure.

Carrefour

Group Data Architect

août 2019 - mars 2020 (8 mois)

Ville de Paris, Île-de-France, France

@LAB Carrefour-Google

Management and oversight of Data assets to deliver high-quality, consistent, and easily accessible data for business users. Collaborating closely with teams across Italy, Taiwan, Belgium, Argentina, Brazil, Spain, Poland, Romania, and France.

GCTO team's mission:

1. Accelerate Carrefour's technological transformation.
2. Evolve the organizational culture to become a leading retail tech company.
3. Ensure efficient and reliable technology operations.

Solocal Group

Data Architect

septembre 2018 - août 2019 (1 an)

Région de Boulogne-Billancourt, France

Project "Move2Cloud": Migrated the data lake from on-premise infrastructure to Google Cloud Platform as part of the global digital transformation initiative.

- Analyzed and documented IT organization's existing on-premise architectures and target GCP environments.
- Developed detailed cartographies, data workflows, and data lineage mappings through reverse engineering.
- Applied expertise in GCP environments and Google Big Data products to ensure a seamless migration.

Sutrix Group

Technical Product Manager

juin 2017 - décembre 2017 (7 mois)

Ho Chi Minh City, Vietnam

Specify and design web applications, specification definition and Product Backlog management.

Support production teams in the development and testing steps.

Startup Weekend

Laureate

janvier 2017 - janvier 2017 (1 mois)

We had the idea to design a mobile application that allows to react collectively and instantly before a political debate. The name of our app is HEADSLAP.

Formation
